ABRAHAM ISRAEL ROCKLYN

Web Developer | WordPress & Full-Stack Developer | AI Integration

Woodbridge, VA • 571-702-3382 • israelrocklyn@gmail.com

linkedin.com/in/israel-rocklyn-789884140 • israelrocklyn.info • github.com/codeROCK-IZZY

SUMMARY

Full-stack **web developer** who builds fast, accessible, search-friendly websites and web applications, from **WordPress business sites** (Elementor, Gutenberg, ACF, WooCommerce) to custom **PHP, React and FastAPI** applications. Handles the whole launch: hosting, DNS and SSL, Core Web Vitals, **technical SEO**, GA4 analytics and conversion tracking. Brings AI engineering experience from Rivet Health and Texas A&M to add **AI chat, smart search and automation** to websites. Built and runs **israelrocklyn.info**, a custom PHP portfolio with a private analytics dashboard, and publishes **23 open-source projects** on GitHub. Pursuing an **M.S. in Computer Science (AI)**.

SKILLS

Web & WordPress: WordPress (Elementor, Gutenberg, Divi, WPBakery, ACF), WooCommerce, Shopify, PHP, HTML5, CSS3, JavaScript, responsive & accessible design (WCAG 2.1/2.2), Core Web Vitals, SEO (Yoast, Rank Math, Ahrefs, SEMrush), GA4, Google Tag Manager, cPanel, DNS & SSL

Marketing & Analytics: Google Analytics 4, Tag Manager, Looker Studio, Hotjar, Microsoft Clarity, Google Ads, Meta Business Suite, HubSpot, Mailchimp, GoHighLevel; Stripe, PayPal and Square payments

Full-Stack: React, TypeScript, JavaScript, Tailwind CSS, Vite; Python, FastAPI, Flask, REST APIs, PostgreSQL, Go, SQL

AI Integration: LLM chat & assistants, RAG search with citations, AI agents (LangGraph), Claude API, embeddings & vector search (pgvector), OCR, speech-to-text

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, IAM), Docker, Terraform, GitHub Actions CI/CD, Git, Linux, CDN & caching, automated testing

PROFESSIONAL EXPERIENCE

AI Engineer | Rivet Health 2024 – 2026

- Designed and developed **full-stack AI applications** from concept to tested release: architecture, backend services, **REST APIs**, database schemas, **React front ends** and model integrations.
- Built **multi-agent workflows in LangGraph** with tool execution, persisted workflow state, **human approval gates**, retries, recovery and audit trails, so automated steps can be paused, reviewed and safely resumed.
- Engineered **RAG pipelines**: document ingestion, OCR, embeddings, **hybrid keyword + vector retrieval** and reranking, producing answers grounded in and cited to their sources.
- Built **evaluation frameworks and automated tests** measuring answer quality, retrieval accuracy, citation correctness, workflow reliability and security.
- Delivered cloud-ready architectures with **Docker, Terraform, AWS** and **GitHub Actions CI/CD**, and used Claude and ChatGPT to speed research, implementation, debugging, testing and documentation.

Artificial Intelligence Research Assistant | Texas A&M Engineering Experiment Station 2023 – 2024

- Researched applied **LLMs, AI agents and semantic retrieval** with a focus on reliability: hallucination prevention, source attribution, access control and responsible AI.
- Designed **controlled evaluation datasets and experiments** to measure retrieval quality, answer accuracy, model behavior and system performance.
- Prototyped integrations across external model APIs, **local ONNX models**, vector databases and distributed inference services; documented architecture decisions, trade-offs and limitations.

Software Engineering Assistant | Southwestern University 2022 – 2023

- Built a **full-stack web application (Python, Flask, React, PostgreSQL)** that asynchronously analyzes GitHub interactions, with API endpoints for retrieving and visualizing participation.
- Designed and implemented **REST APIs** to store and manage data from learning management systems.

Data Center Operations Technician | Amazon Web Services (AWS) 2020 – 2022

- Diagnosed and resolved hardware and infrastructure incidents in **AWS data centers**; installed, maintained and replaced server components to keep capacity available.
- Worked with engineering and operations teams on incident investigation, following security procedures and maintaining technical documentation and incident records.

SELECTED PROJECTS

Open source with tests, CI and published evaluations at israelrocklyn.info. *Results are measured on documented synthetic datasets and benchmarks.*

israelrocklyn.info: Portfolio Website | *PHP, JavaScript, HTML5, CSS3, GitHub API*

- Designed and built from scratch in **PHP, JavaScript and CSS** with no framework: 23 project case studies, light and dark themes, a command palette, a printable résumé and a **CSRF-protected contact form**.
- **SEO-ready**: sitemap, schema.org structured data and clean URLs; served through a CDN with a **strict Content Security Policy** and cookie-free, privacy-respecting analytics.
- Password-protected **analytics dashboard** (bcrypt, CSRF tokens, login throttling) with interactive charts of site visits and GitHub views and clones by day, week and month; **130 automated checks**.

Autonomous Business Operations Platform | *Python, LangGraph, Claude API, FastAPI, PostgreSQL, React*

- AI agents for refunds, invoices and purchase requests with a React approval console and **human sign-off on risky actions**: **96.9% correct outcomes** on 129 cases and zero unauthorized money movement.

Multimodal AI Assistant | *Python, FastAPI, Whisper, OCR, PostgreSQL, React*

- React web assistant that answers questions about photos, scanned PDFs and voice memos, citing the page, line or timestamp: **92% grounded-answer accuracy** and a 4% speech word error rate.

Intelligent Document AI | *Python, FastAPI, OCR, pgvector, ONNX Runtime, React*

- Web app that turns PDFs and scans into structured data and answers questions with **page-level citations**: Recall@5 of 1.0 and 100% field extraction.

Fraud Detection Engine | *Python, Apache Kafka, XGBoost, SHAP, FastAPI, React*

- Real-time fraud scoring on a Kafka stream with SHAP explanations and an analyst case dashboard: **93% of fraud dollars caught** at about 31 alerts a day, 96% precision in the critical band.

AI Research & Knowledge Engine | *Python, FastAPI, pgvector, ONNX cross-encoder, React*

- Team knowledge bases with hybrid search, cross-encoder reranking, source-conflict detection and workspace access control: **100% Recall@5, 99.3% citation precision** and 100% correct "not found" answers.

Also: AI Developer Intelligence, LLM Guardrails Gateway, Distributed AI Inference (Go, Kubernetes), AWS Serverless Event Platform, AWS Data Lakehouse, AWS MLOps Platform and 11 more, each with a write-up at israelrocklyn.info.

EDUCATION

Master of Science in Computer Science, Concentration in Artificial Intelligence — Expected Jan 2028
Southern New Hampshire University (SNHU)

Bachelor of Science (Honors) in Information Systems
Institute of Public Administration and Management (IPAM)
